

## **WINTERIZING PROJECTS**

### **Artic Ban Anti Freeze** (Plumbing)

Safe, odorless and tasteless for fresh water and plumbing systems, boats, RV's , homes and trailers. Use full strength, no mixing required. Protects to -50 degrees. Do not use in automobile radiator or boat engine.

### **Saving Energy** (Electrical)

- Turn down your water heater, normal setting is 140 degrees. By turning down to 120 degrees, you can save up to 10% on your bill.
- Run your ceiling fans in reverse. The warm air up by the fan, will circulate down into your living area.
- Change furnace filters, once a month during winter time. Dirty filters restrict airflow and increase energy demand.
- Turn down the heat, for every degree you turn down the thermostat, you save up to 3% of your heating bill.
